## Study Guide – Video 1

Be sure to have AutoCAD open while you are using these tutorials. Do what's being done in the video. You will have to pause and rewind at various points to get the most out of the tutorials.

1. The primary area that you will use is called the \_\_\_\_\_.
2. The \_\_\_\_\_ allows AutoCAD to offer nearly all of its tools through a compact, graphical interface.
3. The tools in the ribbon are organized into groups that you can access using a set of \_\_\_\_\_.
4. To expand a Ribbon Panel, click on \_\_\_\_\_.
5. The \_\_\_\_\_ allows you to cycle through the different ways to display the Ribbon Panel.
6. The application menu also lets you view a list of \_\_\_\_\_.
7. The \_\_\_\_\_ contains some of the most common tools that you would find in any Windows program.
8. The \_\_\_\_\_ is like a “chat” window that you use to communicate with AutoCAD.
9. The \_\_\_\_\_ is at the bottom of the AutoCAD window, and contains tools that you will use as you draw.
10. If you need help with an AutoCAD command, you can use the \_\_\_\_\_.
