

# Exporting Images as JPG's

The best way to show your ProDesktop design is to create a *JPG* file from your model. This tutorial assumes that you already know how to create a "Photo Album" of your model. Here are the steps for exporting a *JPG* from your *Photo Album*.

1. Open your *Photo Album* file. We will use the *Van* Photo Album. See below:

2. Go to **File > Export > JPG...**

3. Your **JPG** file will be exported and saved in the *same folder* as your **Photo Album**.
4. To Email your JPG, go to **My Computer > Your "H" Drive > World of Tech > Van** folder. You will see a list of files in there.
5. Go to **View > Details**. See Below:
